

# ***BioniNature***

## **New multi-functional paint for interiors based on green nano-technology**

**Bioni Nature** is a first class interior paint which meets the highest of performance expectations and features the following key benefits:

- **extremely durable with lifetime performance**
- **non-toxic, odor-free, washable matte finish**
- **exceeds indoor air quality regulations**
- **permanently prevents mold and mildew growth on the paint film**
- **cuts maintenance costs**

- Freiwillige Prüfung
- Emissionsgeprüft

### Bioni Nature sets new standards

**Bioni Nature** represents a quantum leap in the field of paints and coatings. Based on the latest knowledge from the field of nanotechnology, Bioni has succeeded in developing a unique *multi-functional* interior paint exceeding the highest expectations in terms of performance and reliability.

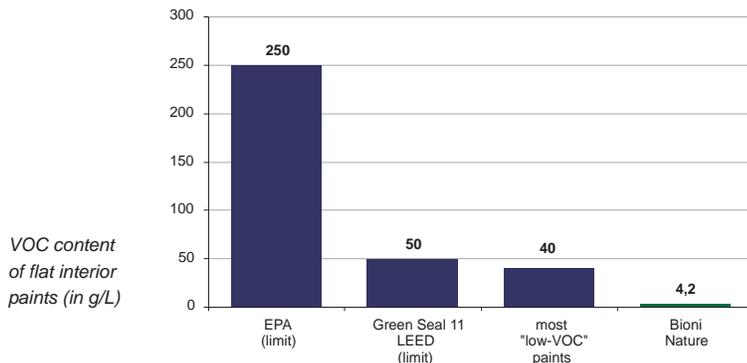

**Bioni** paint was developed jointly with the Fraunhofer Institute which is one of the world's largest scientific Institutes. These developments led to the unique, *world patented*, Green nano-formula within Bioni paint that allows for superior moisture regulating properties. This unique formula affects the painted surface which creates a hostile environment for micro-organisms trying to inhabit the surface.

**Bioni Nature** provides unmatched performance and durability along with permanent prevention of mold, mildew and other unwanted microbes on the paint film. This is all accomplished...

- without affecting indoor air quality,
- without toxic chemicals and
- without sacrificing good looks.

### Superior performance and eco-friendly formula

By virtue of Bioni's **green nano-technology**, **Bioni Nature** exceeds indoor air quality regulations measured in Volatile Organic Compounds (VOC), is environmentally safe and significantly cuts costs for maintenance and repaints.

### Does Your Paint Do This For You ?

- Permanently prevents mold, mildew and other unwanted microbial growth on the paint film
- Exceeds indoor air quality regulations measured in VOC (Volatile Organic Compounds (<5 g/l))
- Is odor-free - can be applied in occupied areas
- Is environmentally safe to apply and cleans up with soap and water
- Is eco-friendly. Can earn LEED credits
- Fire Rating: Class A (ASTM E84)
- Is highly durable - the first truly washable matte finish
- Has superior flow, hiding and adhesion qualities
- Resists moisture and is water vapor-permeable
- Comes in white and 1750 colors

### Recommended Use

Ideal for all types of interiors including residential homes, hotels, resorts & commercial buildings.

**Bioni Nature** is highly recommended for use in high-traffic areas where durability is a necessity.

**Bioni Nature** is an excellent choice for children's rooms, schools, retirement homes and other environments for people with high sensitivity to allergens, odors and toxins.

**Bioni Nature** is also ideal for high-moisture areas such as bathrooms, kitchens, gyms, laundry-rooms and basement-areas.
